Transaction Limits and Authorization Policy

Policy ID: CRF-OPS-101. Version 4.2. Owner: Payments Risk Committee. Effective: January 15, 2026.

1. Purpose and Scope

This policy sets the default limits that apply to consumer and business accounts for card, ATM, ACH and wire transactions, and the authorization controls required when a transaction exceeds those limits. It applies to all channels: branch, online banking, mobile and contact center.

2. Consumer Card and ATM Limits

2.1 The default daily ATM cash withdrawal limit for consumer debit cards is $1,000 per card per calendar day.

2.2 The default daily point-of-sale purchase limit for consumer debit cards is $5,000 per card per calendar day.

2.3 Premier tier customers have a daily ATM withdrawal limit of $2,500 and a daily purchase limit of $10,000.

2.4 A customer may request a temporary limit increase of up to 50 percent above the default for a maximum of 7 calendar days. Temporary increases require identity verification through a one-time passcode.

3. Card Velocity Controls

3.1 More than 5 card-not-present transactions within 10 minutes on the same card automatically triggers a fraud review and a temporary hold on further card-not-present activity.

3.2 Three consecutive declined PIN attempts lock the card for 24 hours.

4. Wire Transfer Limits

4.1 Consumer accounts may send outgoing domestic wires up to $25,000 per business day through online banking.

4.2 Business accounts may send outgoing wires up to $250,000 per business day through online banking, subject to the entitlements configured by the business administrator.

4.3 International wires from consumer accounts are limited to $10,000 per business day through digital channels. Larger international wires must be initiated in branch.

4.4 Any single wire transfer of $50,000 or more requires dual authorization: the initiator and a second authorized approver who is not the initiator.

4.5 Wire requests received after the 4:00 p.m. Eastern Time cutoff are processed on the next business day.

5. ACH Limits

5.1 Consumer outgoing ACH transfers are limited to $15,000 per business day and $40,000 per rolling 30-day period.

5.2 Same-day ACH is available for individual payments up to $1,000,000, in line with the network per-payment limit.

5.3 New accounts open for fewer than 30 days are limited to $2,500 per day in outgoing ACH transfers.

6. Exceptions and Overrides

6.1 Limit exceptions may be approved by a Branch Manager up to 2 times the default limit, and by the Payments Risk Committee above that.

6.2 Every override must record the business justification, the approver, and the expiry date in the case management system.

6.3 Overrides may not be granted to accounts with an open fraud case or an unresolved suspicious activity alert.

7. Monitoring and Review

7.1 Payments Risk reviews limit utilization quarterly and recommends changes to the Payments Risk Committee.

7.2 This policy is reviewed at least annually. Material changes require approval by the Chief Risk Officer.
